TUNNEL LINING SEGMENT

Pre-cast Concrete Segmental Tunnel Lining is one of the most productive underground tunnels construction methods in the recent market. Various type of tunnels have been commonly use in the recent market such as utility tunnels, road tunnels, water tunnels, sewers tunnels and railway tunnels.

SPC Industries Sdn Bhd, specialising in precast concrete business, was established in 2002 and is a wholly-owned subsidiary of Kimlun Corporation Berhad which is a public listed company in Malaysia. SPC has extensive experience in manufacturing of Precast Tunnel Segments for Singapore MRT Circle line contracts and the ongoing Down Town Line 2 & 3, and Thomson Line contracts. Our company has also the distinction of being one of the preferred suppliers to the biggest infrastructure project in Malaysia i.e. the Klang Valley Mass Rapid Transport's (KVMRT) where we are the supplier to the elevated viaducts segmental box girders and underground precast tunnel segments.

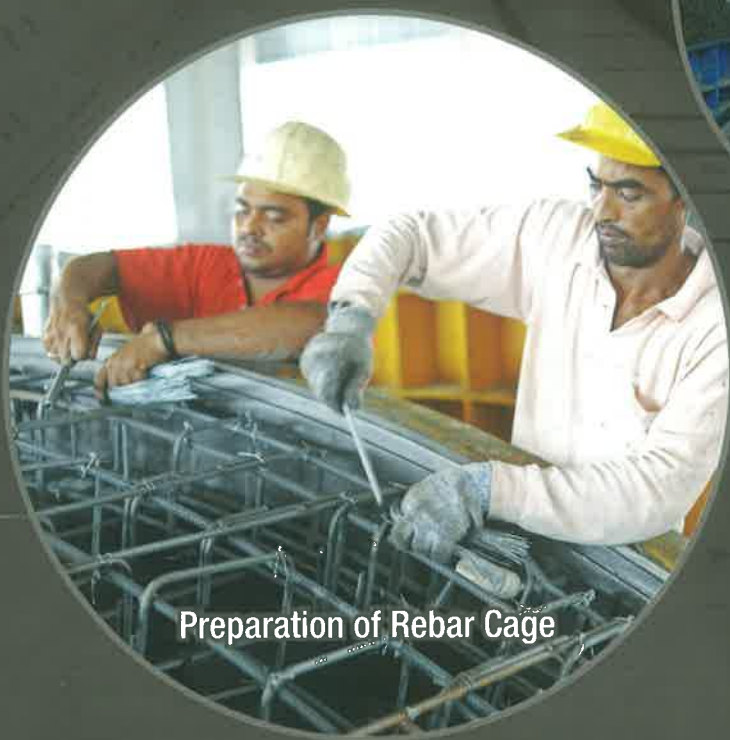

To keep pace with the continued trend towards steel fiber reinforced concrete (SFRC) linings in the current market, our company has abundant experience in manufacturing of SFRC Tunnel Segments for Singapore Thomson Line contract T206 & T207 and Klang Valley Mass Rapid Transport's (KVMRT).

Demoulding Vacuum System

Concreting

Preparation of Rebar Cage

Air Compressor System for Pneumatic Vibrating
